

Like a lighthouse and its
beacon of light, together we are
stronger. Together we can make
a difference in healthcare.

ami
we're already there

Powered by

Universal.one[™]

AMI and Universal.one™ have joined forces to enhance expeditionary COVID-19 frontline services through the efficiency of a comprehensive online vaccine management system.

AMI Expeditionary Healthcare provides tailored healthcare solutions to government agencies, the private sector, international aid organizations, and humanitarian concerns in remote and challenging environments.

AMI is able to provide people, facilities, equipment, consumables, pharmacy products, procedures, and training where healthcare facilities and services are under-resourced or non-existent.

Universal.one™

To support ongoing federal vaccination and testing efforts, AMI is proud to partner with **Universal.one™**, a team of healthcare and technology experts using cutting-edge technology developed in Silicon Valley to seamlessly connect patients and vaccination sites or healthcare providers on a digital platform.

The combined **uVax.one™** and **ami** offering

Backing AMI's expeditionary COVID-19 frontline services is **uVax.one™**, an innovative end-to-end system for managing vaccination on any scale. **uVax.one™**, powered by **Universal.one™**, a multi-national healthcare and technology group, offers configurable modules for appointment scheduling, online consent and pre-screening, workflow management, appointment reminders, reporting and an enhanced additional inventory microservice, integrated with State Immunization Registries using the HL7 prescribed format.

This secure, HIPAA-compliant vaccine administration system enables data-driven decisions based on vaccine availability, risk factors, inventory levels and available vaccine sites to meet public health needs.
